Activity Report: E-Waste Awareness Online Quiz

Subject	E-waste and Environmental Management
Subject Teacher	Prof. Nilima Main
Activity	Online Quiz under the College E-Waste Campaign
Date and Time	14 October 2026, 2:30 PM to 3:45 PM
Venue	Gate 2
Quiz Platform	Wayground (formerly Quizizz), joined by students on their mobile phones

Team Members (E-Waste Quiz Team)

No.	Name	Roll No.	No.	Name	Roll No.
1	Aditya Shinde	24101A0036	7	Srushti Chavan	24101A0074
2	Om Rathod	24101A0040	8	Swapnil Bhabal	24101B0065
3	Ayush Bhogale	24101A0052	9	Prathamesh Salunkhe	24101C0021
4	Om Pawar	24101A0057	10	Sushant Nirate	24101C0026
5	Om Yewale	24101A0069	11	Pushkar Chavan	24101C0046
6	Advay Tongaonkar	24101A0073	12	Pranay Belnekar	24101C0061

Objective

The aim of the quiz was to spread awareness about electronic waste (e-waste) among students in a fun and interactive way. Through simple questions, we wanted students to understand what e-waste is, why it is harmful, and how it can be safely disposed of, reduced and recycled.

About the Quiz

Our team prepared a 16-question multiple-choice quiz on Wayground. The questions covered:

- **Basics:** what e-waste is, which items count as e-waste, and harmful substances (like lead) found in it.
- **Safe disposal and reduction:** correct ways to dispose of e-waste, recycling, and reducing e-waste at home.
- **Did-you-know facts:** how much e-waste the world produces, how little of it is recycled, why e-waste contains more gold than gold ore, and the international event that used medals made from recycled e-waste gold.

How It Was Conducted

Our team members invited students passing by the venue to take part and explained how to join. Students joined instantly by scanning a QR code or entering a game code on their phones, so no registration or printed sheets were needed. As more students kept gathering at the venue, the team started the same quiz again for every new group of about 10 or more students, so that everyone got a chance to play.

Highlights

- Around 60 students from different years and divisions participated in the quiz.
- The top scorer answered 15 out of 16 questions correctly (94% accuracy).
- Most students answered the basic questions correctly, such as identifying what is and is not e-waste.
- The fact-based questions surprised many students and started discussions after the quiz, which was the main learning moment of the activity.
- The short, phone-based format made it easy for students to take part while visiting the other stalls and activities of the campaign.

Conclusion

The E-Waste Awareness Quiz was a successful and engaging part of the college E-Waste Campaign. It helped students learn important facts about e-waste in a short time and encouraged them to dispose of old gadgets responsibly. For our team, it was a good experience in planning, preparing content and conducting an event together. We thank Prof. Nilima Main for her guidance and support.
