PROFILE

Second-year Information Technology student, motivated and detail-oriented with a strong foundation in problem-solving and analytical thinking. Passionate about technology and eager to develop expertise in AI, cybersecurity, software development, and emerging technologies. Enthusiastic about applying engineering principles to real-world challenges, with strong teamwork, communication, and adaptability skills. Committed to continuous learning, innovation, and expanding technical capabilities in the IT domain.

PROJECTS

Smart Library System (Web Development Project) :

A modern web-based library system that enhances the traditional ERP experience by providing real-time book availability, detailed book information, borrowing history, due-date notifications, and an efficient admin dashboard for streamlined library management.

Music Player System(Web Development Project):

A full-featured music player with playlists, audio controls, animations, and responsive design.
